Optional	<ul style="list-style-type: none"> • Cutter drum assembly • Vacuum system

FS150™ Performance Benefits:

The SMITH FS150 is a fast and easy, high-performance, rugged hand-held rotary scarifier/grinder, designed for mechanical surface profiling work. Ideal for leveling high spots, very thick coatings, or overlays on concrete or asphalt. Together with the SMITH FS050 drum-style scarifier, you can achieve the right surface profile faster than conventional diamond grinding.

- Select air or electric power Makita right-angle sanders
- Variety of cutters and cutter drum spacing patterns
- Vacuum port for use with a dust collector
