

SMITH[®] PCD Drums

Diamond Scarifier Drums

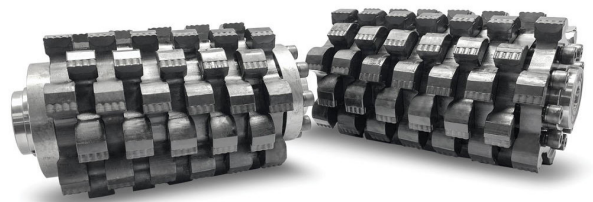

Nano Round

Round

Flat

PCD Performance Benefits:

Polycrystalline Diamond is a composite of diamond particles sintered together with a metallic binder, the only type of diamonds that have self-sharpening properties. These dynamic and durable cutters not only get the job done, but they're also engineered to save you money. Available in flat and round. High-speed kit required for proper operation.

Universal Mounting	One-Time-Buy on Arbor and End Plates
Less Downtime	No Expensive Drum to Balance
3 to 4 times faster cutting	Longer life than diamonds or carbide (up to 4 times the life)
Lower HP Requirements	Thermoplastic and Paint Does Not Stick to Cutters
20% Less Expensive Than Diamond Blades	Faster Removal Speeds
