

TRIP HAZARD Removed to the second sec

SMITH HAS THE SOLUTIONS YOU NEED TO STAY ADA COMPLIANT

SMITH Compact Sidewalk-Grinding Package

MADE IN THE USA WITH

SMITH FS209 with MV360 Dust Collector

SMITH FS209 Scarifier/Grinder

The FS209 drum scarifiers are ideal for quick surface preparation and grinding on concrete and asphalt, with a cut path up to 8 inches wide. The FS209 has portability and flexibility and packs a punch with a 9HP Honda gasoline engine. Can run both flail cutters and PCDs for fast and efficient performance, and easily connects to MV-series vacuums for collecting airborne silica dust.

SMITH MV360 Dust Collector

The SMITH MV360 is a compact and portable industrial grade, non-clogging auto filter-cleaning dry dust collector. The SMITH MV360 helps reduce airborne silica dust levels to meet OSHA safety requirements. It features rugged, all-steel construction to handle medium-duty concrete and asphalt grinding applications.

Sinte

SMITH Deluxe Sidewalk-Grinding Package

SMITH SPS10 with DCS, SR25 Sulky Driver, and MV5500 Dust Collector

SMITH SPS10 Scarifier/Grinder

The SPS10 is our most versatile, high-output drum-style scarifier, ideal for surface prep on a wide variety of asphalt and concrete surfaces. This all-purpose scarifier has a maximum cut width of 10 inches, and can be paired with a wide assortment of cutters and accessories to remove markings, level uneven surfaces, and groove for inlay. The optional Depth Control System (DCS) raises and lowers the drum with the touch of a button for consistent cut depths every time.

Why walk when you can ride? SMITH's SR-25 Sulky Driver connects to your walk-behind equipment, enabling you to increase your productivity and greatly reduce operator fatigue. Attach it to your SMITH SPS10 for an easy to use system you can depend on.

SMITH MV5500 Dust Collector

The SMITH MV5500 is a gasoline-powered industrial-grade, non-clogging, automatic filter-cleaning dust collector, with connection bracket for using with debris separator. Features the Longopac continuous bagging system for easy dust and debris collection and disposal.

Choose Your Drum

PCDs

SMITH Flail-it cutters are comprised of SAE steel and tungsten carbide for tough, durable performance. Ideal reducing high spots, surface preparation, texturizing, and preparing most surfaces prior to applications, or for a final, non-slip finish on trip hazards.

PROS: Very affordable, gets the job done, extremely versatile

CONS: Flail cutters wear out much faster than PCDs, needs replacement more often

SMITH's PCD cutters and drums use self-sharpening polycrystalline diamond technology to gently shave the surface. They last up to 30 times longer than carbide cutters and cut up to 4 times faster than diamond blades, so you can finish the job faster and be more productive.

PROS: Twice as fast as carbide flails, long-lasting and durable with much fewer replacements due to wear and tear

CONS: Higher price than carbide flails, cannot be run with upcut systems

Whether you choose flails or PCDs, trip hazards are quickly reduced to a safe, level, and non-slip condition in practically no time. Plus, our sidewalk-grinding packages keep your operators working with considerably less fatigue. Stay ADA compliant with SMITH today!
